# We are Newterra

Newterra is a trusted provider of modular water, wastewater and groundwater treatment solutions to a wide range of industries and market sectors.

Newterra is recognized as a leader in designing, engineering, manufacturing, and supporting modular treatment solutions for water, wastewater, stormwater, and groundwater remediation. We've been serving clients in a wide range of industries and sectors operate more efficiently, sustainably and safely.

# 10,000+

## Installations Worldwide

Our large installed base reflects our growth in new markets and the trust our many repeat customers place in Newterra.

Our role in sustaining the world's freshwater supply is a responsibility that drives everything we do.

## Our Brands Supply Solutions and Support on a Global Scale

Newterra has a growing number of **Offices**, **Manufacturing Facilities**, and **Service Centers** around the world. With our focus on water-stressed regions and areas of resource development, Newterra has established a strategic infrastructure to meet the needs of an increasingly thirsty planet.

## Decentralized Water & Wastewater

Newterra® offers advanced water and wastewater treatment that provides a **cost-effective and timely alternative to conventional "bricks and mortar" treatment systems**. Whether you're looking to develop or add on to an existing community, Newterra has the right solution that will save on construction costs and regulatory delays.

## Industrial Stormwater

**StormwaterRx®** designs, manufactures, installs and maintains stormwater treatment systems for industrial customers throughout North America and abroad. These systems remove dirt, oil, dissolved metals, nutrients, toxic organics, and more from industrial stormwater. The **StormwaterRx®** product line offers basic, enhanced, and **advanced pollutant removal technologies** backed by decades of innovation and success, helping industrial customers meet their water quality goals.

## Site Remediation/Dewatering

Newterra's groundwater treatment experience runs deep, with the design, manufacture and support a modular system for your water and groundwater challenges. Whether for general public safety – or a **brownfield site intended for redevelopment**. Newterra systems have been used extensively for the clean-up of light, **non-aqueous phase liquids (LNAPL)** that are residuals of gas stations, pipelines, refineries, and storage facilities.
