“Data Changes How We Manage Construction Companies”

Briq uses advanced analytics and automation technologies to enhance profitability and improve business processes for any general or specialty contractor.

Workflow Efficiency

Briq integrates critical systems so your ERP, project management, estimating, and accounting systems can all have shared data, without you having to log in and copy / paste data multiple times into different software.

Picture Perfect Forecasting

Enhance and automate your financial projections. Not only does Briq’s predictive technology enable more accuracy when projecting cash flow, labor, and cost-to-completion, it saves hundreds of hours per month when producing financial report building; like your WIP.

The Smartest Technology

It’s like Google, but built for your construction company. Briq’s search technology allows you to immediately find projects that have become available in your target area. It also quickly answers any query for key business information, like “what projects, if any, are at risk?”
